

# Android Devices

This guide applies to Android phones and tablets running OS version 4.3 or later. The screenshots below were taken on a Google Nexus 5 running Android 4.4.

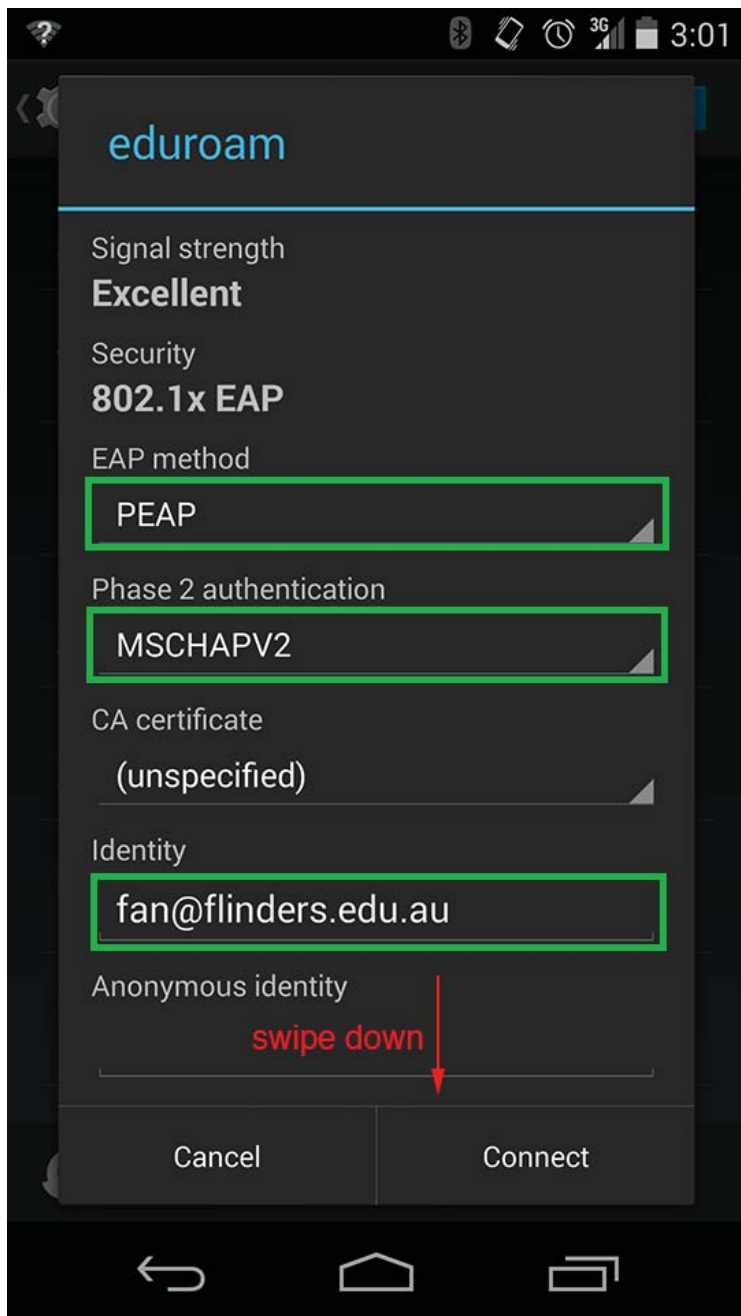

1. Go to the Settings app and tap Wi-Fi:

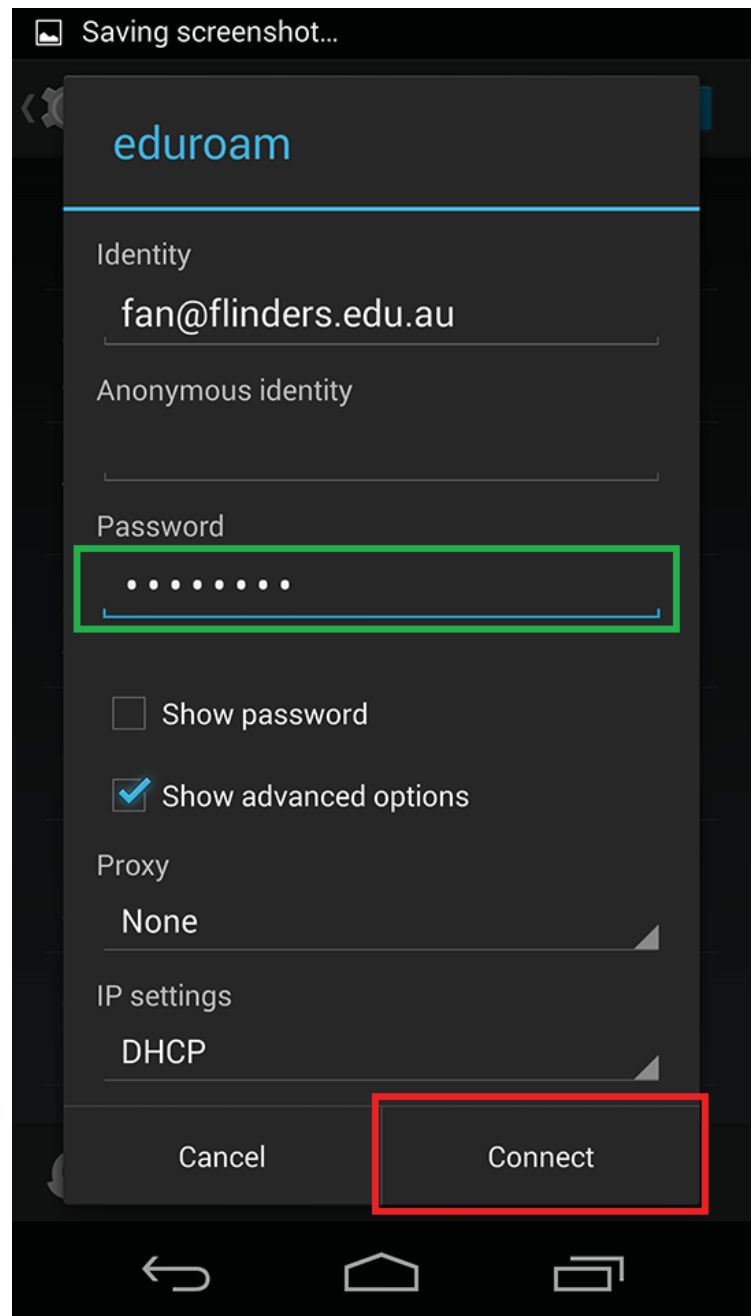

2. Tap **eduroam**:

3. Set the EAP method to PEAP, the Phase 2 authentication to MSCHAPV2, the Identity to your fan with @flinders.edu.au appended afterwards (as shown below) and swipe down to the bottom of the options screen:

4. Enter the password you normally use with your FAN in the Password field and tap the Connect button:

If the connection is successful eduroam will be shown with the word Connected underneath it in the Wi-Fi list:
